We are based on some essential points that are:

- Our day-to-day is focused on a continuous improvement plan, both in the processes and the Management System work which is an essential aspect of preventing errors.
- Improving Quality, Environment and Health & Safety Management System constantly. Committing ourselves to improve the quality of the work, our attitude towards environmental impacts, generated by our own activity, as well as those of our suppliers; cancellation of occupational hazards and personal injury prevention of workers.
- Comply with all requirements imposed by our customers, as well as all those of legal nature, regulatory, and others that the company subscribes, with all our stakeholders in the quality field, the environment and the H&S that were required of us.
- Dedication to constantly improve our performance and prevent pollution. To manage, in a right and respectful way towards the environment, the waste generated as a result of our activity, to project a respectful image every time, to preserve the environment, and to use natural resources in a rational way, trying to minimize the waste.
- Prevention of the deterioration of workers' health. Try to minimize accidents and damages to our workers and subcontractors, implementing aimed measures to improve our performances and work operations in these matters. Cancel and, if not possible, prevent damages and occupational risks, giving the necessary means, training and information to all workers.

- To guarantee the worker's participation and information and make effective their right to the needed counseling.
- Make all our stakeholders participate in our vision, establishing effective communication channels and managing to join our forces to achieve our goals and objectives, under the principle of teamwork.
